

## **SPECIFICATION AMENDMENTS**

Page 14, last paragraph, please amend as follows:

-- The bearing ring 31 of an axial support 7 as shown in Figure 5, formed as an angular ball bearing, has an axial bore 32. Engaging in the axial bore 32 is an only indicated pin 33 a, by means of which the bearing ring 31 is connected in a form-locked manner to a bearing ring (not represented) of a radial support in the circumferential direction in the axis of rotation 19. --
